Bihar-848114**

About the seminar: -

The vision of NEP 2020 is "Use of Technology and its integration" to give a pathway for the students to make India a digitally empowered society and knowledge economy around the globe. The effective use of information and communication technology can improve the quality of education in the 21st century. The use of ICT in the teaching-learning process depends on the attitudes of teachers towards the efficiency of ICT. The UNESCO world education report refers that students and teachers must have sufficient access to improve digital technology and internet in their classrooms, schools, teacher educational institutions, etc. The teacher must have the knowledge and skills to use new digital tools to help all students to achieve a high academic standard. ICT enables the use of innovative educational resources and renewed learning methods, establishing a more active collaboration of students and the simultaneous acquisition of technological knowledge. The initiative of ICT policy in school education is inspired by the tremendous potential of ICT for enhancing outreach and improving the quality of education. ICT in education improves engagement and knowledge retention. When ICT is integrated into classroom discourse, students feel more engaged in teaching-learning process. The working force behind this technology provides different opportunities to make it more enjoyable in terms of teaching-learning the content in different ways. School uses a diverse set of ICT tools to communicate, create, disseminate, store, and manage information. Advantages of ICT are-

1. Upgraded classrooms.
2. Educational resources for teachers.
3. Promotes student engagement.
4. Knowledge retention.
5. Promotes e-learning.
6. Automation.
7. Cost Effective.
8. Bridging the cultural divide.

The present seminar is an attempt to provide a dynamic platform for teachers, teacher educators, professionals, stakeholders and

planners to discuss the current and upcoming role of information and communication technology. It also facilitates the development of different teaching skills desirable for the teachers. All participants of this seminar will get benefit by getting updated information, exchange of ideas and this will make their teaching-learning easier and more productive. It will also suggest updated tools for knowledge construction and collaboration in project/research work while connecting to different communities, networks, and utilising resources.

The theme of the Seminar: -

"Role of information and communication technology in teaching-learning skills."

Sub-theme: -

- The future of ICT-based learning/ Teaching.
- Updated tools of ICT for classroom teaching.
- Precautions to follow while using ICT in teaching.
- The risk of digital learning.
- Impact of ICT in last ten years.
- Role of ICT in performing mathematical skills.
- Role of ICT in teaching language.
- Role of ICT in teaching social studies.
- Role of ICT in teaching science.
- Innovative practices based on ICT.

About the College: -
